PERAK RIVER SAND SDN. BHD. (462355-K)

BACKGROUND

Perak River Sand (PRS) has been in business since 1969. Our founder the late Mr. Teoh Beng Kiat, started operating from a small workshop in Ipoh, Perak with less than ten (10) workers producing precast concrete products. Placing our emphasis on quality and integrity, PRS has established itself as one of the leaders of precast concrete products in Ipoh, gaining the confidence and respect from its wide clientele.

To cater to the rising demands and venturing into bigger arena, we became a private limited company in 1995, now known as PERAK RIVER SAND SDN. BHD. With this new facelift, we are able to better position ourselves and set out a path of continuous development supported by our factories located at Simpang Pulai (5 acres) and Pusing (5.5 acres), in Perak.
BACKGROUND

Quite rapidly, we have advanced into producing other precast products such as pipe culverts, concrete drainage, road kerbs, roman pillars, balustrades and etc. to stay innovative in the industry. The year 1996 constituted a huge leap forward and a milestone for us as our local city council (Majlis Bandaraya Ipoh, MBI) has formally accorded us the approval for the supply of Pipes Culvert Class ‘S’ and Land Drainage within the gazetted land area under its purview.

The endorsement by our local city council is a testament to our capabilities and will remain a driving force for us to move forward to produce high quality products. To this day, the success of this company is largely contributed by its core values and principles. Our successful track records in our efforts of maintaining our valued customers for decades and prioritizing their needs have made us an invaluable partner in this industry.
MANUFACTURING FACILITIES

Spread over 5.5 acres, our factory in Batu Gajah Perdana consists of the pipe moulding machine to produce pipe culvert in sizes of 300mm to 900mm.
